

Lead product storyteller, UX artisan, front-end engineer, and prolific open source contributor. Direct product discourse with branded infographics, succinct [data visualizations](#), and interactive dashboards. Advocate for performant, functional, testable, future-proof, and trusted JavaScript, TypeScript, and Go. Enchanted the UX for Abbott Laboratories, CDW, Corporate Express, Hyundai, Microsoft, and Sears.

Opportunities to innovate find Scott Krause. I envision, design, simplify, code, test, and deliver.

TempoTrip

Lead Product Designer

May 2019 - COVID-19

Rolling Meadows, IL

Team of 7

TempoTrip is a *startup* travel, expense, and itinerary concierge platform that manages flight, car, and hotel reservations for corporate events.

- Designed one of the industry's first Next Generation Storefront (NGS)[™] compliant flight reservation systems. This is the preferred UX as defined by the airline consortium in order to provide a standardized flight [shopping experience](#).
- Designed, integrated, and implemented a hotel shopping and reservation UX with interactive amenities filters and immersive photo carousels.
- Created an [airport geo-proximity](#) microservice that could answer the questions, like; "What are the three closest airports to me right now?".
- Introduced automated [end to end testing](#) as a means of holistically verifying UI with API changes. Condensed two weeks of manual testing into one hour run on demand.
- Introduced the UX team to new conceptual artifacts such as epic user stories, personas, microcopy, microinteractions, A/B testing, and heuristic evaluation.
- Launched [Arcanus55.com](#) (3D JAMstack eCommerce Progressive Web App).

Strategic
Competencies

Atlassian Jira, Design Systems, [Gamification](#), Google Places API, Google [Tag Manager](#), Material Design, Microservices, [Offline-first PWA](#), Olark, SaaS Onboarding, SPA, TravelPort GDS, Wireframing

| Amerimark Interactive | Senior Front-end Engineer | Nov 2014 - May 2019 |
| Lake County, IL | | Team of 9 |

[LTD Commodities](#) is a group of three wildly popular ecommerce retailers offering over 80k products and serving 400k unique visitors a day. It has been my responsibility and pleasure to ensure that the customer journey is performant, responsive, and [delightful](#) on all user agents and devices.

- As a change agent, I advocated, mentored and led the team to embrace modern front-end best practices such as a branded style guide, reactive SPA, offline [PWA](#), [WCAG](#), and TDD.
- Perceptual performance being key to conversion and bounce rates, I redesigned the catalog pages from the ground up to render blazingly fast, raising the Lighthouse [performance](#) and [accessibility](#) scores by 22%. That year we shattered the company's own record, processing over 97000 orders on Cyber Monday.
- Implemented a passive [image compression](#) service utilizing Node.js and Gulp. This service has been running unobtrusively for years saving thousands in download, storage, and CDN costs.
- Reviewed code for best practices, standardization, and [design patterns](#).
- Launched [machvive.com](#) (marketing tech stack project).

| Abbott Laboratories, ADD | Senior Business Intelligence Analyst | May 2008 - Sep 2014 |
| Lake County, IL | Application Technology Group | Team of 21 |

Abbott is a global leader in life sciences offering innovative instrument systems for hospitals, laboratories and clinics. Tasked with building the global Customer Master and Product Hierarchy databases. The objective was to establish a single "Best Version of Truth" of the customer record that could be shared globally to fuel [business data insights](#). I developed the web-based graphical [Master Data UI](#) that allows data stewards from 200 countries to maintain their customer data in a *single* business intelligence repository.

- ❖ New prospect capture was needlessly complex. I created a seamless transition between the Customer Master app and [Salesforce.com](https://www.salesforce.com). Allowing for the real-time verification of new leads against the Customer Master. The salespeople appreciated the simplification because it allowed them to focus on sales and less time cutting and pasting. Awarded the highest employee evaluation achievable [Exceeds Expectations](#).
- ❖ Awarded the Abbott Diagnostics [Silver Award](#) for delivering the FDA compliant Electronic Medical Device Reporting ([eMDR](#)) ahead of schedule and under budget.
- ❖ Developed the [Abbott Label Management System](#) (ALMS). This is a Documentum workflow intranet that allows for the role-based approval of multilingual translations and international compliance of pharma labels and inserts.

| Neo Studios, Inc | Interactive Designer | May 2001 - May 2008 |
| Chicago, IL | Co-founder | Team of 5 |

Neo Studios was an interactive design [agency](#) that created customer engagement apps, websites, and video. I worked closely with the client in every aspect of the project from creative ideation through launch. It was a prolific couple years in which we launched thousands of websites and DVDs.

- ❖ In 2003 I created a simple [photo gallery](#) component for auto dealership websites. The component became wildly popular. By 2004 it was difficult to find an automotive site that did not contain some variation of my script.
- ❖ Pioneered Digital Signage with an employee engagement app that deployed as a screensaver. It allowed us to repurpose dormant workstations into motivational kiosks. We would broadcast dynamic inspirational messages to a sea of cubicles. The targeted "Point of Work" medium changed perceptions and measurably influenced the way people engaged work.

|-----------------------|-----------------------------|---------------------|
| U. S. Office Products | Manager Software Deployment | Jul 1998 - May 2001 |
| Des Plaines, IL | New York and San Jose | Team of 15 |

Managed the configuration and deployment of an n-tier enterprise purchasing and distribution application on the Microsoft Windows Terminal Server platform. With a team of five programmers we scheduled software builds, coordinated database updates and promoted software versions to production servers in Chicago, New York and San Jose.

Responsible for integrity of a source code repository used by over forty developers. Utilized an in-depth understanding of COM to streamline and optimize the deployment of the application suite. Established guidelines for determining which COM component tiers would be compiled based upon binary compatibility and hierarchical dependencies.

|-------------------|----------------------|---------------------|
| The Systems House | Lead Systems Analyst | Aug 1989 - Aug 1996 |
| Rosemont, IL | Pre-sales Liaison | Team of 18 |

Managed the design and development of four client/server [EDI purchasing applications](#) using Microsoft Access and SQL Server. Coordinated the efforts of two in-house programmers and two outside consultants. Responsibilities included requirements definition, production scheduling and version control. Established GUI and naming conventions. Introducing automated testing with Microsoft Test. Further extended the product by integrating Watermark Enterprise document imaging (OLE server) and a vendor CD-ROM interface.

- ❑ Developed a distributed Point of Sale application for Office Product dealers
- ❑ Pioneered the use of ProComm Plus scripting (ASPECT) / Kermit for EDI automation
- ❑ Initiated the Microsoft Solution Provider application
- ❑ Participated in the conversion and normalization of a large legacy databases to Microsoft SQL Server

| Strategic Competencies | ANSI X12 EDI, Live Software Demonstrations, MRO Purchasing, Request for Proposal, Request for Quotation, Trade Show Presentations |
|------------------------|---|

Architectural Proficiencies

Advanced Revelation, Borland Paradox, FrontPage, OS/2, PICK Basic, ProComm Plus, Rev G, Shockwave Flash, UniData, XML, Transact-SQL

United States Navy

Data Processing Technician

Jul 1985 - Jul 1989

Norfolk, VA

Non-commissioned Officer

Team of 24

Operated and maintained shipboard mainframes, supporting 150 user terminals in a real-time environment. Programmed in COBOL under GCOS-6. Performed file maintenance on seven databases containing user's transactions and LOGMARS bar coded data.

- ❖ Designed hand-held barcoding applications for military logistics. These warehousing and inventory applications (LOGMARS SNAP) were stored on an EPROM within hand-held Intermec/Symbol terminals. Programmed in the IRL and TCAL languages.
- ❖ Achieved 4.0 evaluations, first increment advancement, and an honorable discharge.

Strategic Competencies

Accountability, Articulate and Persuasive Communication, GNU Radio SDR, Leadership, Skunkworks, Team Integration, Training and Mentoring

Architectural Proficiencies

C++, Brief, COBOL, CPM, dBase III, DR-DOS, DEC PDP 11, EPROM, FoxBase, Honeywell Bull DPS-6 (GCOS-6), Intermec Trakker 944, LOGMARS, MILSTRIP, NALCOMIS, [NEETS](#), Novell NetWare, R:Base, Revelation, Smalltalk, SNAP, Solaris, SUDAPS, Symbol Wedge

Education

- ❖ Computer Human Interaction Design [Certification](#) - UC San Diego 2016 ([InVision Capstone](#))
- ❖ Google [Analytics](#) and Google [Tag Manager](#) Certified
- ❖ Salesforce.com Admin [Certified](#) (ADM201) - Salesforce.com 2014
- ❖ Implementing the Informatica [MDM](#) Operational Data Store - 2010
- ❖ Informatica [PowerCenter ETL](#) - 2010
- ❖ Object Oriented Analysis and Design ([Lockheed Martin Advanced Concepts](#)) - 1996
- ❖ Microsoft Certified Solutions Developer ([MCSD](#)) - 1996
- ❖ Hands-on [Internetworking UNIX](#) (American Research Group - 40 hrs.) - 1993
- ❖ Data Processing Technician Associate, Naval Training Command (DPC) - 1989

Organizations

- ❑ ACM - Association for Computing Machinery
- ❑ Chicago Digital Accessibility and Inclusive Design
- ❑ Salesforce Administrators Chicago / Milwaukee
- ❑ W3C Data Visualization Working Group
